Tiroler Rohre GmbH (TRM)
Introduction

Tiroler Rohre GmbH (TRM) Introduction

1947
Business start
Tiroler Röhren und Metallwerke AG

Start of pipe and fitting production with grey cast iron

1955
TYTON-joint

1953
Largest electric annealing furnace in Europe

1971
Changed from grey cast iron to ductile iron

1975
Development of the VRS-joint
(2003 VRS-T)

1980
Zinc treatment of pipes

1986
Started the production of
Piling Systems

1986
Introduction of
Snow-making Systems

2013
Renamed
Tiroler Rohre GmbH

2007
In-House
Powder Coating

2018
ZMU-Austria

2017
EPD pile
(European Product Declaration)

Tiroler Rohre GmbH (TRM) Introduction

DEVELOPS MANUFACTURES MARKETS

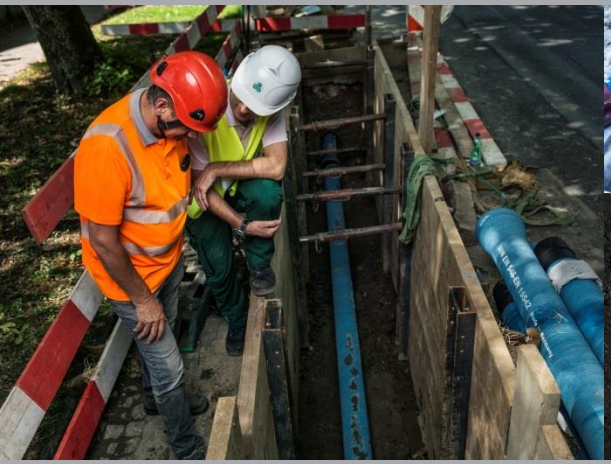

High-grade systems made from ductile iron for the transport of water and sewage and high-pressure applications.

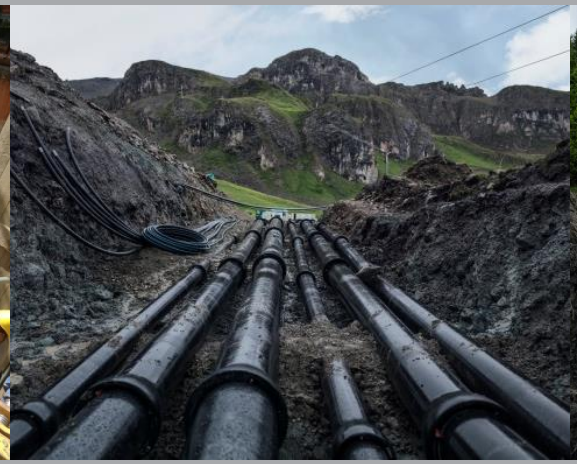

Pile foundation for all kinds of deep-foundation engineering.

Tiroler Rohre GmbH (TRM) Introduction

Pipe Systems

Drinking water supply

Sewage Systems

Snow-making Systems

Penstock for Hydropower

Fire-extinguishing pipes

Special solutions (e.g. pipes for mining industry)

Fittings for all applications

Tiroler Rohre GmbH (TRM) Introduction

Pipe Systems

Drinking water supply

Pipes in accordance with EN 545

ÖVGW-/DVGW-Certificate

Sewage water supply

Pipes and internal coating as per EN 598

CE-marking

Tiroler Rohre GmbH (TRM) Introduction

Pipe Systems

Snow-making systems

Penstock for hydropower

Positive locking System up to 100 bar

Easy installation even in difficult terrain

Deflectable up to 5 ° - less fittings necessary

Tiroler Rohre GmbH (TRM) Introduction

Pipe Systems

Fire-extinguishing pipes

High safety reserves

Fireproof

FM-Approval

Special solutions

Bridge lines

Heat insulated pipes

Trenchless installation

Tiroler Rohre GmbH (TRM) Introduction

Pipe Systems

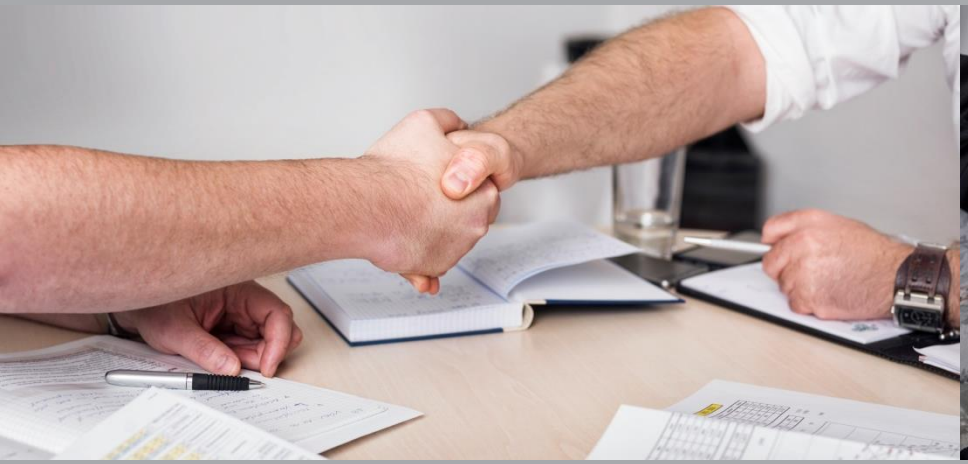

Fittings for all applications

Accessory parts

Tiroler Rohre GmbH (TRM) Introduction

Field Service and application engineering

Customer support

Consultation

Assistance for designer and at the construction site

Installation training

Tiroler Rohre GmbH (TRM) Introduction

Production site in Hall in Tirol

230 employees in 3 shift operation

Plant ground 83.000 m² | Stock 10.000 tons

Output 40.000 tons ductile iron per year

Turnover 100 Mio. EUR

FRISCHHUT

Tiroler Rohre GmbH (TRM) Introduction

Recycling of raw materials

Exhaust air and wastewater treatment

Production heat is fed into the district central heating network
supplying 650 local households | saving 3.100 tons of CO_2 per year

Photovoltaic system with 9.000 m²
supplying 300 local households | maximum performance 851 kWp
